

# KOAMTACON DATA Data Management Suite (DMS)

## The Best Business Management App Suite for KDC Scanners

The first application suite of its kind, KOAMTACON is a data collection cloud suite designed specifically to be used with KDC Bluetooth barcode scanners and RFID readers to collect data in any situation.

### Quick to Launch

By yourself or with KOAMTAC's unparalleled support, your business can be up and running on KOAMTACON in as little as one hour. Just download the app from your favorite app store, enter your activation code, and go!

### Simple to Maintain

Synchronize data with all app-enabled devices automatically. No extra steps required.

### Easy to Use

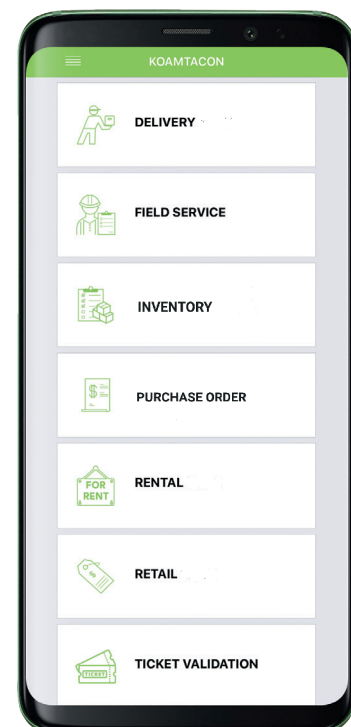

Sign in, connect your scanner, and scan! Effortlessly collect, modify, verify, and report on data in any situation with just a few clicks. No need for thick manuals or long tutorial videos, KOAMTACON is easy as 1-2-3!

### In the Cloud

Wherever you go, KOAMTACON can go with you. And with the power of the cloud, updates are done in real time.

### Compatible with Any Device

Whether you're an Android, Apple, or Windows user, KOAMTACON will work for you.

# KOAMTACON Overview

## Delivery

Manage every aspect of deliveries from customer information to status updates. All delivery information links with master data in the cloud and can be managed from a main dashboard for assignments. Photos are easy to add to all deliveries whether delivery was successful or not and integration with Google Maps ensures the best route is easy to find.

## Inventory

Solve inventory management problems and manage incoming, outgoing, and sitting stock. The simple system ensures even the newest employee can input new products and accurately count the current stock. Easy reporting can be done at any time to check progress and ensure inventory is right on track.

## Rental

Supporting rentals from initial sign-up through return and every step in between. Manage all of your products, the rental term, and customer information directly in the app. Exporting a high-level PDF report is easy directly through the app, eliminating the need for returns to your desk to do paperwork.

## Ticket Validation

Check tickets with a quick scan against all master data in the cloud. Manage several events from one central hub and allow validation right away. Run a quick report to track number of tickets validated and remaining for your event at any time directly from the app.

## Field Service

Maintain detailed work logs complete with location, time, and additional notes. Integration with Google Maps ensures every location will be easy to find and eliminates the frustration of moving from app to app. Report data on all work done in the field can be sent with just a few clicks - eliminating the need for a return to a centralized location.

## Purchase Order

Set up automatic orders to replenish constantly revolving stock while maintaining the ability to manually create a purchase order for any vendor. Combined with the power of a KDC there is no need to return to your desk to finish orders. Integration with any inventory system guarantees you have product when you need it.

## Retail

Answer any customer product inquiry with a quick scan or search. Create orders and check the cloud-managed inventory directly from your store floor. Complete orders for customers without directing them to a computer or customer service area.

## Dashboard

Manage all master data and maintain user registrations all in one spot. Whether you utilize one or all seven applications, you can control them all from one web app.
